

Why I am not going to school at the moment

People are talking about Coronavirus because it

is a new illness. It is similar to a flu-bug.

Children and adults are very good at getting better when they get flu.

To help keep everyone healthy, my school has had to

close.

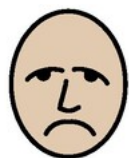

My

Family

I will spend a lot of time at home with my family.

My Family

I may miss school, but my family will look after me and

we can do learning and plan fun activities for me to do

at home.

It's okay if I feel worried or upset;

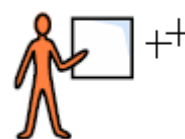

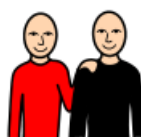

My Family

I can talk to my family about this.

When my school opens again, I can return to school to

continue my learning and see my friends and teachers.
